Hello! How can I assist you today?

I can help you with:

- **Finding job matches** based on your CV or a list of your skills and preferences.
- **Crawling job boards** (such as ITviec or other supported sites) to fetch the latest job postings.

Let me know what you'd like to do!

i need to find jobs related to AI

I searched the database for AI and Machine Learning jobs, but **no matches were found**.

Here is the current state of our database:

- **Total jobs in database:** 0
- **Last crawled at:** Never (null)
- **Note:** *No matches found. The database only has 0 job(s) and hasn't been crawled at all. Consider crawling more listings before trusting this result.*

Would you like me to trigger a crawl to fetch fresh AI job listings?

Since our system has dedicated, high-quality crawler support for **ITviec** (itviec.com), I proactively suggest crawling their AI jobs section:

- **Suggested URL:** <https://itviec.com/it-jobs/ai>
- **Category:** [AI](#)

Please let me know if you would like me to trigger the crawler for this URL (or another target URL)!
